

# Characteristics of applicants in regions with varying levels of population density

## Structure and regional mobility of registered training place applicants

	Population density in the region							All regions	Correlation:
	to under 100	100 to under 150	150 to under 200	200 to under 300	300 to under 500	500 to u. 1,000	1,000 and more		Spearman's rho
<b>Age</b>									
> Applicants under the age of 18	41%	50%	44%	36%	35%	33%	25%	38%	<b>-0.16</b>
> Applicants aged at least 20	27%	20%	25%	31%	31%	33%	41%	29%	<b>0.14</b>
<b>Unplaced applicants from previous years</b>									
> already applied to begin training at an earlier point	36%	34%	39%	41%	41%	42%	46%	40%	<b>0.08</b>
<b>Migrant background</b>									
> Overall	11%	15%	21%	25%	25%	34%	37%	24%	<b>0.20</b>
> Turkish or Arab origin	1%	2%	3%	3%	6%	8%	9%	5%	<b>0.14</b>
> Resettler	6%	7%	10%	16%	8%	12%	10%	10%	<b>0.06</b>
> Other external origin	5%	6%	7%	6%	11%	14%	18%	10%	<b>0.15</b>
<b>Regional mobility</b>									
> Applicants seeking provision more than 100 km from their home	48%	32%	30%	22%	24%	21%	19%	27%	<b>0.16</b>
Number of regions	16	41	31	32	19	20	17	176	

Average proportions in the region classes and the ranking correlations of proportions with population density are stated.
