

1. TITLE OF THE CERTIFICATE (DE) (1)

**Gesellenprüfung im staatlich anerkannten Ausbildungsberuf
Elektroniker und Elektronikerin in der Fachrichtung Energie- und Gebäudetechnik**

(1) in original language

2. TRANSLATED TITLE OF THE CERTIFICATE (EN)(1)

**journeyman's examination in the state-recognized training occupation Electronics
technician – specialising in energy and building technology**

(1) This translation has no legal status.

3. PROFILE OF SKILLS AND COMPETENCES

- Analyse technical systems
- Measure and analyse physical parameters of electrical plants and equipment; identify errors and initiate measures
- Analyse and remedy errors and maintain devices and systems
- Assemble and install components, sub-assemblies and devices
- Assemble and install networks
- Construct and check open and closed loop control systems
- Design energy and building technology systems
- Install and commission energy conversion systems and their control devices
- Set up and commission devices
- Install and configure building systems engineering
- Install and check aerial and broadband communication equipment
- Carry out repeat checks and maintain technical building systems
- Check and comply with data privacy and information security concepts
- Check and assess protective measures for electrical plants and equipment.

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE (1)

Electronics technicians specialising in energy and building technology work for electrical engineering and information technology companies in the craft trades sector. They design, set up, change, network, maintain and repair electrical engineering systems. Their tasks further encompass working on energy distribution and energy generation plants and systems. They also find employment with companies in the real estate sector, with local government operational facilities and with technical buildings suppliers.

(1) if applicable

(*) Explanatory notes

This document is designed to provide additional information about the specified certificate and does not have any legal status in itself. The format of the description is based on the following texts: Council Resolution 93/C 49/01 of 3 December 1992 on the transparency of qualifications, Council Resolution 96/C 224/04 of 15 July 1996 on the transparency of vocational training certificates, and Recommendation 2001/613/EC of the European Parliament and of the Council of 10 July 2001 on mobility within the Community for students, persons undergoing training, volunteers, teachers and trainers.

More information on transparency is available at: www.europass.cedefop.eu.int/transparency

5. OFFICIAL BASIS OF THE CERTIFICATE

Name and status of the body awarding the certificate Chamber of Crafts and Trades	Name and status of the national/regional authority providing accreditation/recognition of the certificate Chamber of Crafts and Trades
Level of the certificate (national or international) ISCED 354 This qualification corresponds to Level 4 of the German and European Qualifications Framework; cf. publication from 1 August 2013 (BANz AT 20/11/2013 B2)	Grading scale / Pass requirements 100-92 points = 1 = excellent 91 - 81 points = 2 = good 80 - 67 points = 3 = average 66 - 50 points = 4 = pass 49 - 30 points = 5 = poor 29 - 0 points = 6 = fail A total of at least 50 grade points are required to pass the examination.
Access to next level of education / training Master craftsman qualification in electrical engineering, state certified technician in the relevant specialisms, specialist clerk for commercial management	International agreements In the field of vocational training, joint declarations on the comparability of qualifications obtained in the respective vocational training systems have been signed on the basis of bilateral agreements concluded between Germany and France and between Germany and Austria.
Legal basis Ordinance on Initial Vocational Education and Training in the Occupation of Electronic technician – specialising in energy and building technology of 03/30/2021 (Federal Law Gazette, Part I, p 662)	

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE

Final examination administered by the competent body: <ol style="list-style-type: none"> 1. after completion of dual training in a company and at part-time vocational school (normal procedure) 2. after retraining in a recognized training occupation 3. as an external examination for working people without formal vocational qualifications or persons who have been trained at full-time vocational schools or other vocational training institutions
Additional information Entry requirements: Entry requirements are not governed by legislation; as a rule, young people are admitted after completing (nine or ten years of) general education. Duration of training: 3,5 years. Training in the "dual system": The knowledge, skills and competences delivered in a training occupation are based on the typical requirements of work processes and prepare the trainees for a specific job as well as for further qualifications. The training is provided in a company and at vocational school: Trainees spend 75% of the duration of training in the company. Here they acquire practical skills in a real working environment. Trainees complete 25% of training time in vocational school where they are taught general and vocational knowledge as it relates to their training occupation.
