

Thinking Space 2: Shaping digital transformation

WHAT SITUATION DO WE FACE?

Studies conducted over the past ten years on the consequences of new technologies have given rise to the supposition that we are now being forced to confront a work and employment structure which is more or less entirely new. Our workshop will explain why this is the case.

WHAT NEEDS TO BE DONE?

- > Make the challenges related to the digital shift **visible** by engaging in networking
- > Develop a better set of **indicators** for the recognition of changes
- > When **designing and deploying new technologies**, accord the same degree of consideration to the skills and experiences of workers as to company goals

HOW CAN I DEEPEN MY KNOWLEDGE?

- > Digital transformation topic cluster at BIBB: [BIBB / Digital transformations](#)
- > Learn more about the consequences technology has on work: [Society - Technology - People](#)
- > Read publications on this topic: [Publications und papers](#)
- > Watch project result videos: [Results videos of individual sub-projects](#)
- > Visit our themed week from 2 to 10 November 2022: [Work remains | Technology helps](#)

Digitalisation does not come out of the blue. We shape its development, application and benefits together.

O I I

The future of the world of work is also digital.

WHERE CAN I OBTAIN SUPPORT?

- > The [Digital transformation](#) topic page pools the work which has been done in this area and provides points of contact for questions relating to every aspect of digitalisation.
- > In order to engage in academic research networking, you may wish to contact the [Polarisation 4.0](#) team and take part in events such as the [themed week](#).
